B2B steam cleaners are commercial-grade cleaning equipment that use high-temperature steam to effectively clean and sanitize various surfaces. These cleaners are specifically designed for business use, such as in hotels, restaurants, hospitals, manufacturing facilities, and other commercial settings.

B2B steam cleaners generate steam at high temperatures, typically ranging from 120 to 180 degrees Celsius, which helps to effectively remove dirt, grime, grease, and stains from surfaces. The high temperature also kills germs, bacteria, and viruses, providing a thorough cleaning and sanitizing result. B2B steam cleaners use only water to create steam, eliminating the need for additional cleaning chemicals. This makes them an eco-friendly and safe cleaning option, reducing chemical exposure and eliminating chemical residues on surfaces. B2B steam cleaners are designed to clean a wide range of surfaces, including floors, carpets, upholstery, tiles, grout, windows, and kitchen equipment. They come with various attachments and nozzles to cater to different cleaning needs.
