The global Bagged Spring Mattress market size is predicted to grow from US$ 1801 million in 2025 to US$ 2782 million in 2032; it is expected to grow at a CAGR of 6.5% from 2026 to 2032.

A bagged spring mattress is a mattress structure formed by placing individual springs into a cloth bag, arranging them one by one, and sewing them together. Each spring operates independently, accurately sensing body pressure and providing corresponding feedback, dispersing body pressure, reducing interference during turning, providing support that conforms to the human body curve, and combining good comfort and noise reduction effects. It is widely used in home bedrooms and various places with high sleep quality requirements.
