A balanced weave belt is a type of conveyor belt that is made up of alternating left and right hand spirals woven together to form a strong and flexible mesh. The spirals are interlocked with each other, creating a balanced and stable structure. This type of belt is commonly used in industries such as food processing, baking, and heat treating, where the belt needs to be able to withstand high temperatures, heavy loads, and provide good airflow. The balanced weave design allows for smooth and efficient movement of products on the conveyor, while also providing excellent drainage and ventilation.
