In the coming years there is an increasing demand for Mill Liner in the regions of United States and Europe that is expected to drive the market for more advanced Mill Liner. Growth in government budgets in the principal countries, increasing of mining fields expenditures, more-intense competition, launches in introducing new products, retrofitting and renovation of old technology, increasing adoption of Mill Liner will drive growth in developing markets. The impact on the cost and availability of raw materials and certain components is uncertain due to potential supply changes. The costs of raw materials have a significant impact on the level of expenses. If the prices of raw materials and related factors such as energy prices increase, and if new companies cannot pass those price increases on to customers, their results of operations and financial condition would suffer.
