The global Bamboo Charcoal Spunlace Nonwoven market size is predicted to grow from US\$ 270 million in 2025 to US\$ 479 million in 2032; it is expected to grow at a CAGR of 8.6% from 2026 to 2032.

In 2025, global sales of bamboo charcoal spunlace nonwoven reached approximately 50,000 tons, with an average selling price of US\$5,500 per ton. Bamboo charcoal spunlace nonwoven is an innovative material combining bamboo charcoal and spunlace technology, widely used in environmental protection, hygiene, filtration, and other fields. The main raw materials are bamboo charcoal powder and polypropylene (PP) fiber. Bamboo charcoal possesses excellent adsorption properties, while polypropylene provides the necessary structural strength. Upstream raw material suppliers include bamboo charcoal producers and synthetic fiber manufacturers, while downstream demand mainly comes from companies in the environmental governance, personal care, medical, and filtration sectors. In the future, the market for bamboo charcoal spunlace nonwoven fabric is expected to expand further, particularly driven by demand from industries such as environmental materials and air filtration, potentially becoming a core component of more eco-friendly products. The total production capacity of bamboo charcoal spunlace nonwoven fabric is approximately 70,000 tons, with a gross profit margin maintained at around 22%. Downstream consumption is mainly dominated by industries such as hygiene, environmental protection, and personal care. Upstream material consumption remains stable, and bamboo charcoal production still relies on domestic and international bamboo resource supplies. Market demand is primarily driven by increased demand for high-performance, environmentally friendly products, particularly in air purification and antibacterial products, where demand is expected to grow further. Therefore, with rising global environmental awareness and market demand for sustainable materials, bamboo charcoal spunlace nonwoven fabrics have a

promising market prospect.
