Flotation machine applies to separation of non-ferrous metal, ferrous metal, noble metal, non-metallic mine, chemical material. And flotation machine can be used in roughing, scavenging, selection or reverse flotation. During the flotation process, pulp will be mixed with drug firstly and agitated. Then target ore grains will selectively attach to bubbles, float onto the surface of pulp, which will be scraped out and collected. And the rest materials will be left there. Thus, the separation is accomplished.
