Barium sputtering target is made of high purity Barium metal. Barium is the fifth element in group 2 and is a soft, silvery alkaline earth metal. Because of its high chemical reactivity, barium is never found in nature as a free element. Its hydroxide, known in pre-modern times as baryta, does not occur as a mineral, but can be prepared by heating barium carbonate. The most common naturally occurring minerals of barium are barite (barium sulfate,  $\text{BaSO}_4$ ) and witherite (barium carbonate,  $\text{BaCO}_3$ ), both insoluble in water. The name barium originates from the alchemical derivative “baryta”, from Greek ????? (barys), meaning “heavy.”
