Batik rice paper is a processed paper that uses batik technique to apply layers on rice paper. It combines the traditional rice paper making process with modern batik technology to present a unique visual effect and texture. This paper is coated with a layer of wax on the rice paper and then dyed to present a variety of patterns of blue background with white flowers or white background with blue flowers, which has a very high sense of art.

In recent years, the market size of batik cloth has continued to expand, mainly due to its unique artistic charm and cultural connotation, as well as consumers' increasing demand for personalized and differentiated products. As a similar artistic processed paper product, batik rice paper also has these characteristics, so its market size is also expected to continue to grow.
