The global Battery-Grade Soda Ash market size is predicted to grow from US\$ 599 million in 2025 to US\$ 1281 million in 2032; it is expected to grow at a CAGR of 11.7% from 2026 to 2032.

In 2025, global production of battery-grade soda ash reached 1.0746 million tons, with an average selling price of US\$570 per ton. The global annual production capacity of battery-grade soda ash is approximately 1.3 million tons, with a gross profit margin of approximately 20.2%. Battery-grade soda ash (sodium carbonate) is a high-purity chemical raw material specifically designed for battery manufacturing. Its purity is typically required to be 99.5% or higher, and the content of impurities (such as iron, copper, zinc ions, and chloride ions) must be strictly controlled at extremely low levels (e.g., chloride ion content ≤ 10 ppm). It mainly serves as a key sodium source in the preparation of sodium-ion battery cathode materials (such as layered oxides and polyanionic materials), and is also used in the synthesis of some lithium-ion battery cathode materials or as an electrolyte additive, significantly impacting the electrochemical performance, cycle life, and safety of batteries. Compared to ordinary industrial-grade soda ash, the production process of battery-grade soda ash is more complex, requiring special processes such as purification and refining to remove impurities and meet the stringent quality standards of battery manufacturing. Upstream raw materials for battery-grade soda ash include limestone, sodium bicarbonate, and other auxiliary materials. The midstream sector consists of battery-grade soda ash manufacturers, while the downstream sector mainly includes industries such as power batteries and 3C batteries.

United States market for Battery-Grade Soda Ash is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for Battery-Grade Soda Ash is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
