A battery operated pruning saw is a portable electric saw powered by a rechargeable battery, designed for gardening pruning, fruit tree pruning, shrub pruning and other tasks. It is usually small in size and light in weight, equipped with a high-speed motor and a sharp chain or saw blade, which can efficiently cut branches with a diameter of about 2 to 10 cm, while eliminating the laborious operation of traditional hand saws and the constraints of power cords. Compared with oil saws or large electric saws, battery operated pruning saws are more suitable for home gardening, orchard management and high-altitude pruning operations, with the characteristics of low noise, low vibration, safety and easy control. Common voltage specifications include 12V, 18V, 21V, etc., which are suitable for different work intensities. With the development of lithium battery technology, such tools are increasingly used in modern gardening and urban greening.

United States market for Battery Operated Pruning Saw is estimated to increase from US\$ million in 2024 to US\$ million by 2031, at a CAGR of % from 2025 through 2031.
