The global Battery Powered Grease Gun market size is predicted to grow from US\$ 1018 million in 2025 to US\$ 1552 million in 2032; it is expected to grow at a CAGR of 6.3% from 2026 to 2032.

The development trend for battery-powered grease guns is expected to continue to grow in the coming years. Battery-powered grease guns offer a more convenient and portable solution compared to traditional manual grease guns. They eliminate the need for manual pumping, making it easier and less tiring for users to apply grease to various equipment and machinery. As battery technology continues to improve, battery-powered grease guns are becoming more powerful and efficient. Lithium-ion batteries, in particular, are being used to provide longer run times and faster charging capabilities. Battery-powered grease guns often come with adjustable pressure settings, allowing users to control the amount of grease being dispensed. This feature ensures precise application and reduces the risk of over-greasing or under-greasing equipment.
