The global Battery Separator Tape market size is predicted to grow from US\$ 587 million in 2025 to US\$ 1366 million in 2032; it is expected to grow at a CAGR of 13.1% from 2026 to 2032.

Battery Separator Tape It is a functional tape used in lithium-ion batteries, electric vehicle batteries, and other rechargeable batteries. Its main purpose is to secure the internal battery separator, prevent short circuits, enhance assembly stability, and maintain mechanical and chemical performance during battery cycles. In 2025, global battery tape production reached approximately 462.5 M m², with an average global market price of around US\$1.3 per m². Annual production capacity is 485 M m². Gross Profit Margin: ~28%. Battery adhesive tapes are an essential component in the lithium battery industry, primarily used for insulation, fixation, and protection of cells and modules. The upstream supply mainly consists of high-performance base films such as PET, PI, and BOPP, as well as specialized adhesives. Midstream manufacturers convert these materials into finished tapes through coating, laminating, and slitting processes. Downstream, battery manufacturers for electric vehicles, energy storage systems, and consumer electronics rely on these tapes for safety, thermal stability, and assembly efficiency. The industry is highly concentrated, with leading global players like 3M, Nitto Denko, and Tesa dominating the market, while Chinese manufacturers such as Sidike, Crown, and Shanghai Yongguan are rapidly expanding their capabilities. Battery adhesive tapes are a critical yet often overlooked component that directly impacts battery safety and performance. As the demand for electric vehicles and high-capacity energy storage continues to grow, the market for high-performance, heat-resistant, and precisely engineered tapes will expand rapidly. Companies that can innovate in adhesive formulation, coating techniques, and automated production will likely gain a competitive edge. In addition, localizing production in China offers strategic

advantages due to proximity to major battery manufacturers and cost efficiencies.
