According to our (LP Info Research) latest study, the global Battery Solvent market size was valued at US\$ million in 2022. With growing demand in downstream market and recovery from influence of COVID-19 and the Russia-Ukraine War, the Battery Solvent is forecast to a readjusted size of US\$ million by 2029 with a CAGR of % during review period.

The research report highlights the growth potential of the global Battery Solvent market. With recovery from influence of COVID-19 and the Russia-Ukraine War, Battery Solvent are expected to show stable growth in the future market. However, product differentiation, reducing costs, and supply chain optimization remain crucial for the widespread adoption of Battery Solvent. Market players need to invest in research and development, forge strategic partnerships, and align their offerings with evolving consumer preferences to capitalize on the immense opportunities presented by the Battery Solvent market.

Battery solvent is an important component used to dissolve electrolyte or serve as battery electrolyte. Common battery solvents include organic carbonate solvents (such as dimethyl malonate, diethyl carbonate, dimethyl carbonate), carbonate solvents (such as acrylonitrile carbonate, butene nitrile carbonate), thioether solvents (such as carbon disulfide, phosphorus trisulfide), organic acid solvents (such as formic acid, acetic acid), cyanide solvents (such as sodium cyanide, potassium cyanide), and ammonia solvents (such as ammonia water, ammonia gas). Different types of batteries use different solvent formulations, and the correct choice of battery solvent is critical to ensure battery performance, stability and safety.

At present, 95% of solvents are mainly carbonates, including dimethyl carbonate (DMC),

diethyl carbonate (DEC), ethyl methyl carbonate (EMC), ethylene carbonate (EC), propylene carbonate (PC), etc. . In addition, there are also solvents such as carboxylic acid esters, sulfuric acid esters, fluorine-containing esters, and sulfur-containing esters, but none of them have been widely used.
