The global Beidou Vehicle Terminal market size is predicted to grow from US$ 1727 million in 2025 to US$ 2178 million in 2031; it is expected to grow at a CAGR of 3.9% from 2025 to 2031.

The Beidou vehicle terminal is the main engine of the Beidou satellite monitoring system. It mainly realizes positioning and navigation through Beidou satellites, and communicates with the monitoring center through the transmission network. The Beidou satellite positioning monitoring system is composed of front-end equipment, transmission network and monitoring center to realize positioning tracking and intelligent functions.

Since the start of construction of the Beidou system in 1994, from Beidou-1 and Beidou-2 to the official opening of the Beidou-3 global satellite navigation system in July 2020, it has lasted 27 years. At present, there are a total of 45 Beidou satellites in orbit. The space and ground infrastructure have formed relatively complete service capabilities. The industrial system has basically formed, industrial applications have begun to take shape, and overseas market expansion has achieved positive results. According to statistics from relevant agencies, by the end of the '13th Five-Year Plan', the scale of China's satellite navigation industry will exceed 400 billion yuan. In terms of product manufacturing and industry services, China's navigation and location service technology innovation with Beidou as the core continues to be active, and key technologies such as domestic Beidou chips and modules have made breakthroughs. By the end of 2021, the total number of terminal products with Beidou positioning function in society will exceed 1 billion units/sets; more than 7.9 million road operating

vehicles have installed and used the Beidou system, and nearly 8,000 Beidou terminals of various types have been applied and promoted in the railway field. Beidou system has more than 100,000 sets of automatic driving systems for agricultural machinery, and the output value of downstream operation and service links such as medical health, epidemic prevention and disinfection, remote monitoring, and online services is nearly 200 billion yuan; in terms of mass applications, smart phones and smart wearable The Beidou public field application represented by equipment has made a comprehensive breakthrough. In 2021, China's smartphone shipments supporting Beidou will reach 324 million, accounting for 94.5% of the total domestic smartphone shipments. In addition, in terms of policies and regulations, China has issued more than 1,000 policies and regulations related to satellite navigation. The China Beidou Satellite Navigation Standardization Committee has issued a total of 32 national standards and 56 special standards in the field of Beidou, which strongly support product manufacturing, engineering construction, operation and maintenance, and promote the large-scale application and industrialization of Beidou; completed the national Beidou satellite navigation standard system The revision will provide a basis for the formulation and revision of national standards in the Beidou field for a period of time to come.
