It can heat objects regardless of their shape, and is used to heat objects that have complex shapes or are difficult to heat over an open flame. Depending on the material of the belt, this heater excels at heating objects in the range of human living temperatures up to around 200°C, and is used in a variety of fields. Because they heat objects by converting electricity into heat, they can be heated as long as electricity is available. Since they require a few other tools, they are easy-to-use heaters with a low degree of difficulty.
