Bicycle brake cables are the essential component of the bicycles that are used in the braking system. Bicycle brake cables have polymer or plastic coating on its upper surface which protects it from the corrosion and dust. Bicycle brake cables require time to time oiling and greasing to ensure its long life span and safety.

Flexibility is one of the key parameters while selecting a bicycle brake cable in order to maintain proper functioning and durability. Bicycle brake cables have only two applications, one is in the front braking system and another is in the rear braking system. With the increasing demand for disc brake systems in bicycles, the requirement of durable, anti-corrosive and high strength cables is also increasing.
