According to our LPI (LP Information) latest study, the global Bicycle Crank Motor market size was valued at US\$ million in 2023. With growing demand in downstream market, the Bicycle Crank Motor is forecast to a readjusted size of US\$ million by 2030 with a CAGR of % during review period.

The research report highlights the growth potential of the global Bicycle Crank Motor market. Bicycle Crank Motor are expected to show stable growth in the future market. However, product differentiation, reducing costs, and supply chain optimization remain crucial for the widespread adoption of Bicycle Crank Motor. Market players need to invest in research and development, forge strategic partnerships, and align their offerings with evolving consumer preferences to capitalize on the immense opportunities presented by the Bicycle Crank Motor market.

A crank motor also called a mid-drive motor or a central motor, is a centralized motor, which is connected to a crankshaft through interlocking gears. The gear at the bottom of the motor locks into the gear ring, which is placed on top of the crankshaft. The crank motor is connected to a battery, which in turn, is connected to an electronic control unit. The battery is concealed. A switch to start and stop the motor is routed to the control unit.

Growing concerns for clean energy transportation and rising traffic congestion are expected to further increase the demand for e-bikes that largely use crank motors. E-bikes are widely used in countries such as China, Europe, and North America. Due to huge increase in urban population, the number of individual commuters and freight movement in these regions have raised. Such developments have resulted in traffic congestion, contributing the popularity of e-bikes. With the increasing number of end-

users and manufacturers preferring crank motors over hub motors set to witness substantial growth during the forecast period. APAC is expected to be the major revenue contributor to the bicycle crank motor market throughout the forecast period. China is the major contributor to the market due to government's initiatives to limit motorcycles in the city to avoid traffic disruption and accidents.
