## Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

The bidirectional zero-leakage triple offset frictionless valve is a high-performance butterfly valve in which the shaft center of the valve stem deviates from the center of the disc and the center of the body at the same time, and the axis of rotation of the valve seat and the axis of the valve body channel have a certain angle. With this design, the valve can achieve zero leakage in both directions, with higher durability and cost-effectiveness.
