According to this study, the global Bile Duct Cancer Drugs market size will reach US\$ million by 2031.

Bile duct connects the liver to the gallbladder and carries bile, which is synthesized by the liver and stored in the gallbladder. The main function of bile is breakdown of fat during digestion. Bile duct cancer is commonly known as cholangiocarcinoma. The specific cause of bile duct cancer is unknown, but few factors that cause bile duct cancer are long-term inflammation in the liver, biliary stones, abnormalities in bile duct such as cysts, infection with liver fluke parasites leading to bile duct leading to cancer, and exposure to harmful chemicals or toxins. Major symptoms associated with bile duct cancer include jaundice, weight loss, loss of appetite, discoloration of urine and stool, abdominal pain, itching, and fever. Some drugs used to treat bile duct cancer include 5-fluorouracil (5-fu), gemcitabine, cisplatin, capecitabine and oxaliplatin.

The global pharmaceutical market is 1475 billion USD in 2022, growing at a CAGR of 5% during the next six years. The pharmaceutical market includes chemical drugs and biological drugs. For biologics is expected to 381 billion USD in 2022. In comparison, the chemical drug market is estimated to increase from 1005 billion in 2018 to 1094 billion U.S. dollars in 2022. The pharmaceutical market factors such as increasing demand for healthcare, technological advancements, and the rising prevalence of chronic diseases, increase in funding from private & government organizations for development of pharmaceutical manufacturing segments and rise in R&D activities for drugs. However, the industry also faces challenges such as stringent regulations, high costs of research and development, and patent expirations. Companies need to continuously innovate and adapt to these challenges to stay competitive in the market and ensure their products reach patients in need. Additionally, the COVID-19 pandemic

has highlighted the importance of vaccine development and supply chain management, further emphasizing the need for pharmaceutical companies to be agile and responsive to emerging public health needs.
