The global Biobased Lactic Acid market size is predicted to grow from US\$ 75.28 million in 2025 to US\$ 128 million in 2032; it is expected to grow at a CAGR of 8.0% from 2026 to 2032.

Using bio-based raw materials enables the transition away from fossil-based sources and helps us move toward a more sustainable society. Bio-based materials also offer better recyclability than fossil-based options. Bio-based products can make the economy less dependent on non-renewable, fossil raw materials, and prevent non-renewable resources from being depleted. Bio-based materials can also open new opportunities in product development by providing novel product characteristics and by using biomass for new purposes.
