The global Biobetter market size is predicted to grow from US\$ 1044 million in 2025 to US\$ 1941 million in 2032; it is expected to grow at a CAGR of 9.4% from 2026 to 2032.

Biobetters, also known as biosuperiors, are recombinant protein drugs from an identical class as a present set of biopharmaceuticals is not similar to the source. It is neither a wholly novel medicine nor a generic version of an old drug. It is a biological product designed to increase clinical efficacy while also improving tolerance and lowering dosing/administration frequency.

According to the Global Use of Medicines 2023 released by IQVIA Institute, the global drug expenditure in 2022 was about US\$1.48 trillion (excluding COVID vaccine and treatment-related expenses), and it is predicted to grow at a rate of 3%-6% in the next few years. In terms of drug expenditure, this number in China was about 166 billion dollars in 2022. It is expected that the expenditure on medicines will increase in the next few years. From the perspective of demand, the trend of population aging, the increase of residents' wealth and the improvement of health awareness will drive the demand for medicines.
