Biodegradable agricultural mulch film is an eco-friendly alternative to traditional plastic mulch used in farming. Made from natural materials (e.g., starch, polylactic acid) or synthetic biodegradable polymers, it helps conserve soil moisture, regulate temperature, suppress weeds, and enhance crop yields while breaking down naturally in the soil after use. This eliminates the need for removal and disposal, reducing environmental pollution and labor costs. Biodegradable mulch films are particularly beneficial for sustainable agriculture, aligning with environmental regulations and minimizing the long-term impact of agricultural practices on ecosystems.
