## Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

Expanded polystyrene (EPS), polyurethane (PUR), expanded polypropylene (EPP) and other conventional plastic materials are presently dominating the insulated panels demand in the present market scenario globally. Continuously increasing non-biodegradable plastic waste has resulted into high intolerance towards the conventional plastics with the imposition of strict regulations restraining the usage of conventional plastics. The cold chain participants are gradually switching to the Biodegradable insulated panel from conventional expanded plastic insulated panel to prevent their business from getting impacted by the plastic usage regulations. Thus, the global biodegradable insulated panel market is expected to witness steep inclination in during the forecast period and create large incremental opportunity for the biodegradable insulated panel market players across the globe.
