The global Biodegradable Polyamide market size is predicted to grow from US$ 892 million in 2025 to US$ 2109 million in 2031; it is expected to grow at a CAGR of 15.4% from 2025 to 2031.

The impact of the latest U.S. tariff measures and the corresponding policy responses from countries worldwide on market competitiveness, regional economic performance, and supply chain configurations will be comprehensively evaluated in this report.

Biodegradable polyamide refers to a type of polyamide (a polymer containing amide linkages –CONH– in the backbone) that is capable of being broken down by microorganisms (such as bacteria, fungi, or enzymes) into natural substances like water, carbon dioxide (or methane in anaerobic conditions), and biomass under specific environmental conditions (e.g., soil, compost, marine environments). These materials combine the mechanical strength of traditional polyamides with the environmental benefits of biodegradability.

The key players of Bio Nylon Resin include Arkema, DuPont and Kingfa, etc. The top three players hold a share over 45%. Asia Pacific is the largest market, has a share about 48%. In terms of product type, PA 1010 is the largest segment, occupied for a share of about 23%, and in terms of application, Automobile Industry has a share about 50 percent.
