Abstracts

The global Biogenic Silica market size is predicted to grow from US\$ 603 million in 2025 to US\$ 1106 million in 2032; it is expected to grow at a CAGR of 9.2% from 2026 to 2032.

Biogenic Silica is an alternative to traditional silica. The combustion of rice husks produces rice husk ash, which is mainly composed of silica. High-purity silica can be produced by controlled combustion after acid treatment. Biogenic Silica is mainly used in tires, industrial rubber, paints and coatings, animal feed and personal care.

Biogenic silica, particularly from sources like rice husk ash, has been explored for its potential to improve plant growth, enhance resistance to pests and diseases, and increase tolerance to environmental stress.
