## Abstracts

The global Biosafety Clean Room market size is predicted to grow from US\$ million in 2025 to US\$ million in 2032; it is expected to grow at a CAGR of %from 2026 to 2032.

Biosafety laboratories are biological laboratories and animal laboratories that avoid or control the hazards of manipulated harmful biological factors through protective barriers and management measures, thereby meeting the requirements of biological safety

The global cleanroom market is influenced by various industries, including pharmaceuticals, biotechnology, electronics, aerospace, and healthcare. The pharmaceutical and biotechnology industries were experiencing significant growth, which was driving demand for cleanrooms. Research, development, and manufacturing processes in these industries require controlled environments to ensure product quality and regulatory compliance. The electronics industry, particularly semiconductor manufacturing, relies on cleanrooms for the production of microelectronics and semiconductor devices. With the increasing complexity and miniaturization of electronic components, the demand for cleanrooms remained strong. The COVID-19 pandemic highlighted the importance of clean environments in healthcare settings. Hospitals and healthcare facilities increasingly invested in cleanrooms for research, testing, and sterile compounding to support infection control and patient safety. The market saw an increasing demand for modular and flexible cleanroom solutions that could be easily expanded or reconfigured to accommodate changing production needs. The Asia-Pacific region, including China and India, was experiencing robust growth in industries that required cleanroom facilities. This region was becoming a significant market for cleanroom solutions.
