The report requires updating with new data and is sent in 48 hours after order is placed.

The water quality biological toxicity detector measures the acute biological toxicity caused by heavy metals and other organic pollutants in the tested environmental samples by measuring the change of luminosity of luminescent bacteria. Compared with traditional fish, fleas and other aquatic organisms as biological detection methods, the luminescent bacteria method is simple, fast, sensitive, adaptable, repeatable, high-precision, low-cost, and widely used. The biological toxicity of substances can be measured.
