Bipolar disorder, also known as manic-depressive disorder, is a mental illness. It is a mental health problem that primarily affects mood. Symptoms of bipolar disorder are extreme irritability or agitation, a period of feeling empty, loss of interest in normal activities, sleep problems, etc. According to Pfizer, Inc., bipolar disorder affects over 5 million people in the U.S. Bipolar episodes are characterized by a drastic change in behavior and mood, and range from joyful and overexcited (manic episodes) to extremely sad and hopeless (depressive state). These disorders have different types of episodes such as manic episodes, hypomanic episodes, depressive episodes, and mixed episodes. Causes of bipolar disorders include childhood trauma, stressful life events, self-esteem problems, and genetic inheritance. People across the world marked "March 30" as a World Bipolar Day to spread awareness about the disorder and erase the stigma of mental illness. Large number of people suffering from this mental condition resort to drinking to lift their mood. According to the National Institute on Alcohol Abuse and Alcoholism, 27.6% of the people with bipolar disorder become addicted to alcohol, while over 16% engaged in alcohol abuse.

The global pharmaceutical market is 1475 billion USD in 2022, growing at a CAGR of 5% during the next six years. The pharmaceutical market includes chemical drugs and

biological drugs. For biologics is expected to 381 billion USD in 2022. In comparison, the chemical drug market is estimated to increase from 1005 billion in 2018 to 1094 billion U.S. dollars in 2022. The pharmaceutical market factors such as increasing demand for healthcare, technological advancements, and the rising prevalence of chronic diseases, increase in funding from private & government organizations for development of pharmaceutical manufacturing segments and rise in R&D activities for drugs. However, the industry also faces challenges such as stringent regulations, high costs of research and development, and patent expirations. Companies need to continuously innovate and adapt to these challenges to stay competitive in the market and ensure their products reach patients in need. Additionally, the COVID-19 pandemic has highlighted the importance of vaccine development and supply chain management, further emphasizing the need for pharmaceutical companies to be agile and responsive to emerging public health needs.
