Bipolar Lifting Magnet is a professional lifting equipment that generates a strong magnetic field through two opposite polarity magnetic poles. It is used to lift and move various ferromagnetic materials, such as steel plates, steel pipes and mechanical parts. This magnet has a unique design that can reduce the loss of adsorption force caused by material shape or surface irregularities while maintaining high magnetic force. Bipolar lifting magnets are usually used in scenarios that require precise operation or specific magnetic force direction. They are flexible to operate and have low energy consumption. They are widely used in manufacturing, construction, port loading and unloading, and logistics.

United States market for Bipolar Lifting Magnet is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
