The global BIPV Solar Carport market size is predicted to grow from US\$ 230 million in 2025 to US\$ 557 million in 2032; it is expected to grow at a CAGR of 13.6% from 2026 to 2032.

The BIPV Solar Carport is an advanced architectural energy solution that seamlessly fuses photovoltaic power generation technology directly into the structural fabric of parking shelters, redefining them as dual-purpose building envelopes that serve as both weather protection and high-efficiency power plants. Unlike traditional add-on solar systems, this BIPV (Building Integrated Photovoltaic) product acts as the primary building material itself, integrating structural waterproofing, robust load-bearing capabilities, and aesthetic design into a single, cohesive unit. By transforming standard parking infrastructure into active energy-generating assets, it enables the localized production and immediate consumption of clean electricity, perfectly aligning with modern zero-carbon building standards and smart energy management goals. Its core strengths lie in its superior structural integrity, excellent waterproofing and weather resistance, architectural aesthetic integration, and the elimination of redundant building materials, making it a highly sustainable and valuable addition to modern infrastructure. In 2025, the industry's capacity utilization rate was about 65% and the average gross margin was approximately 28%. Upstream, photovoltaic modules and steel structural materials remain the core inputs, with suppliers such as LONGi, Trina Solar, JinkoSolar, First Solar, ArcelorMittal, and POSCO providing standardized generation units and structural frameworks. The midstream segment focuses on canopy structure engineering, green energy system integration, load-bearing design, construction execution, and grid interconnection to ensure reliable operation under site-specific conditions. Downstream demand is primarily driven by residential and commercial scenarios, with representative customers including Vanke, Country Garden, and Wanda

Group.
