The global Bisphenol A for Epoxy Resin market size is predicted to grow from US\$ 2979 million in 2025 to US\$ 4072 million in 2032; it is expected to grow at a CAGR of 4.7% from 2026 to 2032.

Bisphenol A for epoxy resin is an aromatic diol intermediate produced by the condensation of phenol and acetone. It is mainly reacted with epichlorohydrin to produce bisphenol-A-type epoxy resins, commonly known as DGEBA/BADGE epoxy resins, and is also used in solid epoxy resins, brominated epoxy resins, powder-coating epoxy resins and vinyl ester resins. In 2025, Global Bisphenol A for Epoxy Resin sales are estimated at 2,900 kilotons, with an average ex-works price of about 1,050 US\$/Ton.

The value chain of Bisphenol A for epoxy resin starts from benzene, propylene, cumene, phenol and acetone, moves through BPA production and purification, and then reacts mainly with epichlorohydrin to produce liquid, solid, brominated and modified epoxy resins for coatings, anti-corrosion systems, electrical and electronics, copper-clad laminates, composites, adhesives, potting compounds, wind turbine blades and construction materials.

Demand for Bisphenol A used in epoxy resin is mainly driven by upgrades in electrical and electronic materials, growth in copper-clad laminates and PCB production, stable demand for industrial anti-corrosion coatings, expansion of wind-blade and composite materials, and increasing use of structural adhesives and construction repair systems. Bisphenol-A-type epoxy resin remains the mainstream epoxy system because of its adhesion, chemical resistance, electrical insulation, mechanical strength and formulation flexibility. Electronic-grade epoxy resins and copper-clad laminates require

BPA with lower chlorine, color and ionic impurities, while wind blades and heavy-duty coatings support demand for stable, large-volume supply. Stricter BPA regulation in food-contact coatings in Europe and North America may limit some can-coating and sensitive consumer uses, but industrial, electronics, energy and composite applications continue to support the long-term demand base.
