## Abstracts

The global Bitumen Emulsion Plant market size is predicted to grow from US$ 268 million in 2025 to US$ 436 million in 2032; it is expected to grow at a CAGR of 7.4% from 2026 to 2032.

Bitumen Emulsion Plants is an equipment system specially used to produce asphalt lotion. It disperses asphalt in water to form a stable lotion, namely asphalt lotion, through specific physical and chemical methods. This lotion has good fluidity and construction performance at room temperature, and is widely used in road construction, waterproof engineering and other fields.

Currently, the global Bitumen Emulsion Plant market maintains steady growth, mainly benefiting from the continuous increase in demand for green road construction and maintenance. There are three major trends in the industry: upgrading environmental protection technology to promote the application of bio based emulsifier equipment, gradually popularizing intelligent control systems, and the strong demand for mobile devices in emerging markets. The market competition pattern is clearly differentiated, with international brands dominating high-end continuous production lines, while Chinese manufacturers occupy an important share in developing markets with their cost-effectiveness advantages. Despite facing challenges such as fluctuations in raw material prices, the pace of industry innovation is still accelerating, and new technologies such as emulsified recycled asphalt are expected to open up new growth opportunities.
