Bitumen, also known as asphalt, is a sticky, black and highly viscous liquid or semi-solid form of petroleum. Thanks to its waterproofing qualities, it is widely used in construction. Bituminous membranes are perfect for waterproofing roofs, basements, below-ground structures, bridges and other structures.

Increased investment in infrastructure projects, such as commercial and residential buildings, tunnels, bridges, and transportation systems, has driven the demand for waterproofing solutions, including bituminous membranes. Bituminous waterproofing membranes are commonly used in roofing applications, including flat and low-slope

roofs. The need for roofing replacements, repairs, and new installations has contributed to market growth. The trend toward green and sustainable building practices has created opportunities for modified bitumen membranes that can be used in green roof systems to manage stormwater and improve energy efficiency.
