The blanket pre-shrinking and shaping machine is a pre-treatment equipment specially used in the production of blankets, wool blankets and other textiles. It is mainly used to pre-shrink and shape the fabric through heat, moisture and mechanical action. The machine precisely controls the temperature, humidity and tension to stabilize the size, shape and feel of the fabric after pre-shrinking, and prevent shrinkage or deformation during subsequent use. The blanket pre-shrinking and shaping machine is usually used for the treatment of high-end fabrics such as wool and cashmere to ensure their smooth surface, comfortable feel, and improve the durability and appearance of the fabric.
