Meat packing paper is a specialized type of paper used in the food industry to wrap and protect various types of meat, poultry, and seafood. This paper is typically coated with a thin layer of wax or polyethylene to create a moisture-resistant barrier that prevents juices from leaking out and helps maintain the freshness and quality of the meat. The coating also provides a degree of insulation, helping to keep the meat at the proper temperature during storage and transportation. Meat packing paper is often designed to be breathable, allowing air to circulate and reducing the risk of spoilage. It is commonly used by butchers, grocery stores, and food service establishments to package both fresh and processed meats, ensuring they remain safe, sanitary, and appetizing for consumers.

The global Bleached Meat Packing Paper market size is projected to grow from US\$ 138 million in 2024 to US\$ 204 million in 2030; it is expected to grow at a CAGR of 6.7% from 2024 to 2030.
