Blockchain technology's ultra-transparent ledger system keeps track of the source of the digital asset. With regard to cryptocurrencies, digital IDs, copyright and royalty protection, real estate, tax regulation and compliance, administering the Internet of Things, and other areas, the technology's security and transparency have been used effectively and over time. Its decentralized characteristic makes it more difficult to tamper with, increasing user popularity. It is a cost-effective and preferable choice due to the little human participation, the elimination of third-party verifications, better transparency, the peer-to-peer network, and simplicity of usage. Its widespread use across many industrial sectors, including BFSI, healthcare, and manufacturing, has increased its appeal.

The global Blockchain IoT market size is projected to grow from US\$ 1426 million in 2024 to US\$ 7732 million in 2030; it is expected to grow at a CAGR of 32.5% from 2024 to 2030.

A significant sum of money—roughly USD 50 billion—is being invested by some of the largest banks in the world, including Banco Santander, UBS, State Street Corp, Credit Suisse Group AG, Bank of New York Mellon Corp, Barclays PLC, HSBC Holdings Plc, and Deutsche Bank AG, in the creation of a blockchain-based digital cash settlement system. Thus, driving the blockchain IoT market revenue. Market CAGR for blockchain IoT is driven by the rising concern regarding IoT security. Due to the expansion of internet services, the Internet of Things technology is now widely employed. According to 'The Mobile Economy 2020' by the GSM Association, 25 billion internet-connected devices will be worldwide in 2025, up from 12 billion in 2019. Additionally, the risk of cyber threats has increased due to the growing use of online services. According to a report from 2020, around 67% of businesses have experienced cybersecurity risks, and employees carry out 34% of cybercrimes. However, because of its decentralization and emphasis on peer-to-peer networks, blockchain technology will increase the security of IoT applications.
