The research report highlights the growth potential of the global Bluetooth Beacons market. Bluetooth Beacons are expected to show stable growth in the future market. However, product differentiation, reducing costs, and supply chain optimization remain crucial for the widespread adoption of Bluetooth Beacons. Market players need to invest in research and development, forge strategic partnerships, and align their offerings with evolving consumer preferences to capitalize on the immense opportunities presented by the Bluetooth Beacons market.

Bluetooth beacons are becoming increasingly popular across industries as they are a cost effective and simple deploy model. As these beacons are supported by almost all operating systems, their demand is expected to increase. Bluetooth beacons are deployed by businesses to send content and information, which are contextually relevant, to users at specific locations. They open up the probability of connecting the online virtual world with the offline, physical world by providing context –aware information to mobile users. Bluetooth beacons devices broadcast signals and messages to smart devices under range, in the form of notifications. They basically consist of a chip and various electronic components on a small circuit board. As these devices offer a more personalized and enhanced user experience, the market for Bluetooth beacons is projected to grow at a healthy pace.

The key factor driving the industry growth is the increased number of applications powered by beacons and Bluetooth Low Energy (BLE) tags. Beacons are witnessing growing penetration across asset tracking and machine/equipment status observation in high volume verticals. At the same time, the markets for both existing and new applications are maturing, leading to larger roll-outs. Growing integration of beacons in cameras, LED lightings, point of sale (POS) devices, digital signage, and vending machines is expected to propel the industry growth over the forecast period. Apart from retail applications, beacons are also projected to become a common commodity in industrial applications.
