Floating docks also provide safety and accessibility, important qualities expected to propel the floating dock industry forward. Moreover, new government defense efforts such as construction of floating docks for submarines and warships are likely to aid the growth of the market. The biggest hurdle expected to restrain the market expansion during the forecast period is government regulations to protect marine ecology. Manufacturers must obtain approval before commencing construction and installation of floating docks to avoid damage to aquatic and marine systems. New projects by various governments have the potential to propel the floating dock market forward during the forecast period.
