A body grip jigsaw is an electric cutting tool, a type of jigsaw. Its biggest feature is the "grip-style" design - the user holds the low housing at the front of the machine body with a handbag to control it, rather than the T-handle on the top. This structure allows the operator to have closer control and flexibility when making fine, curved or inverted cuts, and is especially suitable for making precise bends or bevel cuts on materials such as wood, plastic, and metal. Body grip jigsaws are commonly used in woodworking, cabinets, building decoration, and DIY hand-made scenes. Some high-end models are also equipped with functions such as stepless speed change, swing cutting, dust removal port, and LED lighting to improve cutting quality and work comfort.
