Body sugaring paste is a natural hair removal method that uses a mixture of sugar, water, and lemon juice to create a sticky paste that is applied to the skin and then removed, taking the hair with it. This method is gentle on the skin and less painful than traditional waxing, as the paste adheres only to the hair and not the skin. Body sugaring paste is also all-natural and free of harsh chemicals, making it a popular choice for those with sensitive skin. It can be used on all areas of the body and is known for leaving the skin smooth and hair-free for longer periods of time.

The global Body Sugaring Paste market size is projected to grow from US\$ million in 2023 to US\$ million in 2030; it is expected to grow at a CAGR of % from 2024 to 2030.
