A bomb suit, also known as an explosive ordnance disposal (EOD) suit, is specialized body armor designed to protect bomb disposal personnel from the blast effects of explosive devices. These suits are constructed using layers of high-strength materials such as Kevlar, ballistic nylon, and foam to absorb and mitigate the impact of shrapnel, heat, and pressure waves. Bomb suits typically include a helmet with a face shield, torso protection, and coverings for the limbs, providing comprehensive protection while allowing some degree of mobility and dexterity. They are equipped with features such as built-in communication systems, cooling systems, and quick-release mechanisms for emergency removal.
