Borosilicate Tubing is a type of glass with silica and boron trioxide. The boric oxide makes the glass resistant to extreme temperatures, and also improves its resistance to chemical corrosion. Borosilicate glass is processed by advanced production technology by heating the glass to make internal glass melting. Borosilicate glass tubes are hollow pieces made of borosilicate glass. There is a high content of silicon and boron in borosilicate glass tubes.

The products in this report refer to borosilicate tubes with component content of B<sub>2</sub>O<sub>3</sub> (g/g) of more than 8%.
