The global Bovine Serum Albumin (BSA) Detection Kit market size is predicted to grow from US\$ million in 2025 to US\$ million in 2032; it is expected to grow at a CAGR of % from 2026 to 2032.

Bovine serum albumin (BSA) is a globulin in bovine serum. Most commercial serum-free culture media are formulated with various biomacromolecules that can replace the function of serum, such as bovine serum albumin (BSA), transferrin and insulin. As a heterologous protein, BSA may produce adverse immune responses in the human body when it exceeds a certain concentration, thus affecting the safety of biological products. Therefore, the detection of BSA residues is used as an important indicator for the quality control of biological products.
