A carton sealing machine, also called case sealer, is a piece of equipment used for closing or sealing corrugated boxes. It is most commonly used for regular slotted containers (RSC) and can involve adhesive (cold water-borne or hot melt adhesive), box sealing tape, or Gummed (water activated) tape.

This market has witnessed significant growth owing to increased usage in food and beverage industry, consumer goods and pharmaceutical industry. Increased investment in carton sealing machine by leading players is expected to favourably impact market growth over the forecast period.

The Asia Pacific is expected to be the fastest-growing market over the forecast period owing to extensive usage in China and India, the major two countries of large population worldwide. Developing Countries such as India, Vietnam and Indonesia have great potential due to the low labour cost. Although average selling prices are lower in the Asia Pacific, high demand is expected to result in sizable market revenue over the next six years.
