Braided reinforced silicone hose is a flexible pipe made of high-quality silicone material with one or more layers of braid (such as polyester fiber, nylon or steel wire) embedded in the tube wall to enhance its strength and pressure resistance. This structure allows the hose to withstand high working pressure and temperature while maintaining good flexibility, and has excellent tensile resistance, kink resistance and chemical corrosion resistance. Braided reinforced silicone hose is widely used in fields that require high-reliability fluid transmission, such as industrial manufacturing, food processing, pharmaceuticals, chemicals and high-end laboratory equipment, ensuring stable operation and long life under complex working conditions.
