Computer Numerical Control (CNC) machining is a manufacturing method that utilizes pre-programmed software to guide the movement of equipment. CNC can use a single set of prompts to direct three-dimensional cutting tasks. There is no need for a live operator because the process is fully automated. Mills, grinders, lathes, and more can all be controlled using CNC technology. CNC machining is perfect for manufacturing solid raw materials, including brass. Brass is CNC machined for applications that require strength and corrosion resistance. Brass is considered a premium material, so optimizing its use as much as possible is important.
