A bristle brush is a type of grooming or cleaning tool consisting of bristles attached to a handle or backing. The bristles can be made from a variety of materials, such as natural animal bristles, synthetic fibers, or plant-based fibers. Bristle brushes are designed to perform various functions, including hair grooming, scalp stimulation, application of products, or surface cleaning. They are commonly used in tasks like brushing hair, exfoliating the skin, applying makeup, or removing dust and debris from surfaces. Bristle brushes offer different levels of stiffness, density, and flexibility, providing desired results depending on the specific application.

The industry trend of bristle brushes is driven by a growing demand for sustainable and eco-friendly materials, as well as an increased focus on personal grooming and self-care.
