## Abstracts

The global Brushless Lithium Battery Hedge Trimmer market size is predicted to grow from US\$ 347 million in 2025 to US\$ 573 million in 2032; it is expected to grow at a CAGR of 7.6% from 2026 to 2032.

In 2024, global Brushless Lithium Battery Hedge Trimmer production reached approximately 1.84 million units, with an average global market price of around US\$ 180 per unit.

A brushless lithium-battery hedge trimmer is a portable landscaping tool powered by lithium-ion batteries and driven by a brushless DC motor that reciprocates the blades to trim hedges, shrubs, and ornamental plants. Compared with traditional gasoline hedge trimmers, this product uses high-energy-density lithium batteries and a high-efficiency brushless motor to achieve a lighter weight, low noise, zero exhaust emissions, and reduced routine maintenance costs. The machine typically consists of a brushless motor, reduction transmission, double- or single-sided blade assembly, battery pack, motor controller, safety clutch, guards, and ergonomic handles. The brushless design eliminates carbon-brush wear, extends motor life, and improves efficiency, making the tool more suitable for long-duration operations in landscaping maintenance, municipal greenery, and premium residential properties, and thus attractive to both professional groundskeepers and high-end DIY users.

In the value chain of brushless lithium-battery hedge trimmers, the upstream mainly consists of battery cell and pack manufacturers (power- or tool-grade lithium-ion cells and BMS modules), brushless motor and controller suppliers (providing permanent-magnet brushless motors, control boards, and power MOSFET/IGBT components), metal and plastic component suppliers (alloy or high-carbon steel blades, engineering-

plastic housings, aluminum die-cast parts), and electronic component vendors (Hall sensors, MCUs, relays, switches, etc.). Representative cell/battery suppliers may include large lithium-battery players such as CATL, BYD, LG Energy Solution, Samsung SDI, and Panasonic, while the motor and controller are often provided by numerous specialized motor makers and ODM electronics manufacturers. The mid-stream is composed of hedge-trimmer brands and OEM/ODM assemblers, responsible for product design, injection molding, stamping, assembly, and testing. Downstream channels include landscaping-equipment distributors, hardware chains, big-box home-improvement stores, e-commerce platforms, and rental service companies, while end users range from municipal landscaping and road-maintenance departments to professional landscaping contractors, property-management firms, and household gardening consumers.

The annual production capacity of a single-line Brushless Lithium Battery Hedge Trimmer is approximately 30k units, with a gross profit margin of approximately 25%-40%.

United States market for Brushless Lithium Battery Hedge Trimmer is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for Brushless Lithium Battery Hedge Trimmer is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

Europe market for Brushless Lithium Battery Hedge Trimmer is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

Global key Brushless Lithium Battery Hedge Trimmer players cover EGO Power, Makita, RYOBI, DeWalt, Hychika, etc. In terms of revenue, the global two largest companies occupied for a share nearly % in 2025.
