Bucket tooth locking pins are specialized fasteners used to secure bucket teeth to the excavator or loader bucket. These teeth are the replaceable tips on the edge of the bucket that engage with the material being dug or moved, such as soil, rock, or debris. The locking pins hold the teeth in place, ensuring they remain firmly attached during the rigorous activities of excavation and loading. They must be robust, properly maintained, and replaced when necessary to ensure the equipment's reliability and to avoid costly downtime due to lost or damaged teeth.

United States market for Bucket Tooth Locking Pins is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
