The report requires updating with new data and is sent in 48 hours after order is placed.

The global Building Thermal Insulation Materials market size is predicted to grow from US\$ 28320 million in 2025 to US\$ 39740 million in 2031; it is expected to grow at a CAGR of 5.8% from 2025 to 2031.

Building insulation materials are the building materials which form the thermal envelope of a building or otherwise reduce heat transfer.

Insulation may be categorized by its composition (natural or synthetic materials), form (batts, blankets, loose-fill, spray foam, and panels), structural contribution (insulating concrete forms, structured panels, and straw bales), functional mode (conductive, radiative, and convective), resistance to heat transfer, environmental impacts, and more. Sometimes a thermally reflective surface called a radiant barrier is added to a material to reduce the transfer of heat through radiation as well as conduction.

Global building thermal insulation materials main manufacturers include Saint-Gobain, Kingspan Group, Rockwool International, Johns Manville, Owens Corning, Knauf Insulation, Dow, etc., totally accounting for about 73% of the market. Europe is the largest market, with a share over 38%. As for the types of products, it can be divided into stone or rock wool, glass wool, EPS or XPS and others. The most common product is stone or rock wool, with a share over 41%. In terms of applications, it is widely used in roof, wall, floor and others. The most common application is wall, with a share about 60%.
